For current laboratory charges, contact SHAC Billing.

This Centers for Medicare & Medicaid Services (CMS) Fee Schedule (to the left) can help give you an idea of what amounts will be billed to your listed insurance for some of our more common procedures.

Understanding Your Cost of Care at SHAC

The amount billed for a service and the amount ultimately paid are not necessarily the same. When SHAC bills the insurance you have added in your file we charge them the current Centers for Medicare & Medicaid Services (CMS) fee(s) as listed here.

Insurance reimbursement and patient responsibility are determined by your specific health plan, contracted benefits, coverage requirements, and the services provided. The charges listed here are estimates for commonly provided services and are intended to help you understand potential costs before receiving care.

Actual charges depend on the services provided, diagnosis, treatment plan, insurance benefits, and any additional tests, procedures, medications, supplies, or specialty services required. This guide is not a comprehensive list of all services offered by SHAC. Prices are subject to change without notice.

Deductible / Self-Pay Patients

Self-pay patients may qualify for a 65% discount on qualifying office visit charges. Additional services may not qualify for the self-pay discount.

New Insurance? Let us know!

Updating insurance is critical to managing account balances. If you have a new insurance plan or it changed at the beginning of the year, please let us know. This will help ensure charges are as accurate as possible.

Questions About Charges?

We are here to help! You can contact the SHAC Billing Office at (505) 277-3136 or shacbilling@unm.edu
